

Hello PCC Members

I would like to welcome you to our November Program night on Macro Photography.

On Friday the 20th **of November at 7.30 pm** we will have the pleasure of Alan Henderson from Minibeast Wildlife.

Zoom Meeting link : <https://zoom.us/j/97240229716>

Alan and his team produce a wide variety of wildlife imagery, specialising in high quality insect and spider images. He has worked closely with wildlife for over 20 years and has become a specialist in the field of invertebrates. His knowledge of insects, spiders and other invertebrates enables him to capture many superb moments of natural behaviour and is key to his success in macro photography.

Alan will talk about some of the key elements and techniques he utilizes when photographing this fascinating group of animals and showcase a variety of his images, and happily answer any questions members have.

Alan's work has been published worldwide in books, magazines, apps, museum and zoo graphics and on-line.

We are so looking forward to seeing you for this fantastic finish to our program events for this year.

Program officer - Trish
